FOREWORD

-INTRODUCTION-
To The Yamaha Parts Fiche

This parts fiche lists parts and sub-assemblies for the YFS200J. When preparing a parts order, please refer to the most recently updated microfiche for this model.

THE YAMAHA PARTS FICHE

SYMBOLS

I	Inactive, no longer available
U.R.	Use size (thickness) and/or number as required
U.N.	Use as many as you need
T	Number of teeth in a gear
V	Voltage for light bulbs
S	"S" type oil seal or "S" type circlip
SD,SO,SW	"SD", "SO", or "SW" type oil seal
E,R	"E" or "R" type circlip
F/No.	Frame No. (Applicable Machine No.)
L.M.	Locally made
O.L.	Obtain locally
AP	Alternate Part

SUPERSEDED PART NUMBERS

If part 'A' has been superseded by part 'B', the superseding part number "B" will appear in the part number listing with the superseded part number "A" appearing in parentheses immediately following the description.

EXAMPLE:

Ref. No.	Part No.	Description	Qty.
	(Part 'B')	(Part 'A')	
8	123-45678-00-00	CYLINDER (111-12345-00-00)	1

A part that has been supersede to a kit may be identified by a 99999-00000-00 part number appearing in the part number column. The old superseded part number will appear in parentheses immediately following the description. Listed directly below the 99999 part number will be those parts making up the kit. The description of the parts making up the kit will be preceded by a small black dot (.) and the description will be indented one letter space.

EXAMPLE:

Ref. No.	Part No.	Description	Qty.
8	99999-12345-00	CYLINDER (111-12345-00-00)	1
	234-56789-00-00	• HEAD, CYLINDER	1
	345-67890-00-00	• GASKET, CYLINDER	1

SIZES

Except for steel balls (ball sizes are indicated in inches), all parts sizes are indicated in millimeters as in the following examples:

Hose (Rubber or Vinyl)	Inside Diameter - Length
O-Ring	Section Area - Inside Diameter
Washer, Shim, Collar.....	Inside Diameter - Outside Diameter Thickness (Length)

ASSEMBLIES AND COMPONENT PARTS

Assemblies and their component parts, are identified by an indentation of one letter space, and the description is preceded by a dot (.). If two main assemblies are listed, and have the same basic description (i.e.: left and right sides of the same assembly), one will immediately follow the other. If each of these main assemblies is made up of almost the same components, these component parts will be listed immediately under the second main assembly line and will be indicated, as noted above.

If the component is the same for both main assemblies, the quantity indicated will be the total required. If the component is not the same for both main assemblies, the quantity for each separate item will be listed separately.

EXAMPLE:

Description	Qty
CARBURETOR ASSY, LEFT	1
CARBURETOR ASSY, RIGHT	1
. JET, PILOT	2
. NOZZLE, MAIN	2
. LEVER, STARTER, LEFT	1
. LEVER, STARTER, RIGHT	1

APPLICABLE SERIAL NO.

(1) Engine Serial No.

(2) Frame Serial No.

FOREWORD

THE YAMAHA PART NUMBER

The Yamaha part number consists of 12 digits. Each number represents a specific piece of information relating to a replacement part. The following is a guide for reading and interpreting the Yamaha part number.

BASIC PART NUMBER CONFIGURATION:

MODEL CODE NUMBER

FIRST THREE DIGITS . . . 000-00000-00-00

Every model in each Yamaha product line is assigned a model number to identify that particular model. All component parts are given the model code number relating to the model on which they were first used.

Example: 4DU-00000-00-00 identifies the XJ600SE.
3FA-00000-00-00 identifies the YFA1E.

BASIC CODE NUMBER

MIDDLE FIVE DIGITS . . . 000-00000-00-00

These “Middle Five Digits” indicate the type of part i.e., piston, rings, lower units, etc. The five digits are broken down as follows:

The “Major Classification” indicates the section to which the parts belong, i.e., engine, electrical etc. The “Intermediate” and “Minor Classifications” indicate more specific details.

Example:

DESIGN CODE NUMBER: 000-00000-00-00

The design code distinguishes like component parts from one another when specification differences are involved. For example, distinguishing a standard size piston ring from an oversized piston ring.

Example:

4BR-11610- 0 0-00 Standard Piston Ring Set for XJ600SE
4BR-11610- 2 0-00 Oversize Piston Ring Set for XJ600SE

DESIGN CHANGE CODE NUMBER: 000-00000-00-00

This code number is used to identify a difference between a new component part and old one when a new part is created by changing the old one.

Example: YFZ350E

2GU-11610-0 0 -00 PISTON RING SET, STD. - ORIGINAL
2GU-11610-0 1 -00 PISTON RING SET, STD. - FIRST DESIGN CHANGE

Only major changes to performance, durability, quality, appearance, cost or interchangeability will affect a part number change.

COLOR CODE & SIZE CODE NUMBER: 000-00000-00-00

When applicable, the last two digits of the part number identify:

1. Color Code: The painted color or type of plating or surface treatment used on certain parts.
2. Size Code: The last two digits are also used to show the size of parts (mm). Such as the thickness of shims or the size of pistons.

HARDWARE (Fastener) PART NUMBER CONFIGURATION:

TYPE:

A fastener part number always begins with the number “9” followed by either a 0, 1, 2, 3, 4, 5, 6, 7 or 8 designating one of eight major divisions within this group.

FOREWORD

Example:

- 9 0 000-00000-00 "0" designates various types.
- 9 1 000-00000-00 "1" designates bolts, cotter pins, etc.
- 9 2 000-00000-00 "2" designates screw, nuts, etc.
- 9 3 000-00000-00 "3" designates oil seals, o-rings, bearings, etc.
- 9 4 000-00000-00 "4" designates spark plugs.
- 9 5 000-00000-00 "5" designates bolts and nuts.
- 9 7 000-00000-00 "7" designates ISO bolts.
- 9 8 000-00000-00 "8" designates ISO screws and nuts.

The only major divisions which the mechanic should become familiar with are those related to the general hardware (nuts, bolts, and washers), since these are the most commonly used and most often replaced items. By knowing how to interpret the part number, the dimensions of a piece of hardware can be determined. This can be very helpful during major engine repair, and general parts replacement.

BOLT EXAMPLE:

91311 - 06 018 - 00
6mm outside diameter 18mm in length

EXCEPTION:

It is NOT possible to identify the LENGTH of bolts having a 901 prefix. Only the bolt diameter can be identified with this number.

NUT AND WASHER EXAMPLE:

95301 - 08600 - 00 NUT
8mm inside diameter

90201 - 25290 - 00 WASHER
25mm inside diameter

-MODEL LABEL-

A label called "Model Label" is affixed in the location as indicated in (3) below. When using this parts catalogue, please be sure to cross-reference the "model code - production code No." in the catalogue to the "model code - production code No." indicated on the Model Label affixed onto the product concerned.

I

INTRODUCTION

This bulletin contains a comprehensive listing of V.I.N. and Primary ID numbers and service literature part numbers for 1997 models.

Important: Beginning with 1996 model ATVs, the Primary ID is derived from the V.I.N. (frame number) instead of the engine number.

The Primary ID is derived from the *V.I.N.* as follows:

For identification purposes, the factory has released the following list of starting production numbers.

If the service literature used in prior years is still current, the literature part number will still be listed, but "Same as . . ." will appear in the appropriate Manual column.

Possible Neutral Switch Disconnection - YFM350X

(The following Tech Exchange subject was submitted by Phil Pickup of Cycle Sports Center in Orlando, FL. Thanks Phil! Your Tech Exchange hat is on its way!)

The neutral switch on a YFM350X has a bullet type connector (see Fig. 1 below) which in heavy brush may become disconnected from the push on type wire lead. If this is a reoccurring problem for a customer, a switch with a screw on type wire lead (PN:4KM-82540-00-

00) (see Fig. 2 below) is available. In addition, it will be necessary to cut the old connector off of the neutral switch wire and replace it with a 5mm flat eye connector (90890-05209-00).

NOTE: No warranty applies. This modification is optional according to operating conditions.

Improper Kickstarter Usage May Create Severe Gear Damage - YFS200, YFZ350

If a model equipped with a kickstarter is allowed to roll backwards in gear with the kickstart lever depressed, severe damage may occur to the kickstart gears and/or crankcase. This usually is the result of attempting to restart a unit on a hill while engaging the clutch

with the kickstarter depressed and the unit coasting backwards. Consequently, it is absolutely necessary for the unit to either be on level ground (in neutral) or the parking brake set before attempting to use the kickstarter.

Electronic Parking Brake Interlock Switch - YFM35FXH~J, YFM350XJ, YFZ350J

ATV models equipped with the new Electronic Parking Brake Interlock Switch produce an engine backfire when the switch is left on and the engine reaches 2300rpm. This is to alert the rider that the parking brake has been left in the "ON" position.

When troubleshooting for an engine misfire or running problem, first make sure the parking brake switch is in the "OFF" position and functioning correctly.

Checking Oil Level of Limited Slip Front Differential (LSD) - YFM350FWBJ, YFM35FXG/H/J

To check the oil level of the LSD, remove the oil filler bolt ① and check if the oil level is visible. If it is visible, the oil level is very close to correct. Using a small flat blade screwdriver or similar instrument, slide the screwdriver into the filler hole ② at the bottom until it reaches the oil. Remove the screwdriver and measure the distance from the oil level to the bottom of the fill hole. That distance should be 3-5mm for the proper oil level.

NOTE: Be sure the machine is level when checking the amount of oil. A slight tilt towards the side may cause a false reading. Be sure to use LSD oil. Refer to Tech Exchange MF94-006.

- SUBJECTS:**
1. Oil Leaks From Left Crank Seal - YFA1/YFM350X, ER, U, FW/YFM35FX/YFM400FW
 2. Incorrect Frame Part Number - YFB250UJ
 3. Oil Leaks From Right Side Crankcase Cover and/or Kickstarter Binds in the Down Position - YFS200 (All Year Models)

©1997 YAMAHA MOTOR CORPORATION, U.S.A.

Oil Leaks From Left Crank Seal - YFA1/YFM350X, ER, U, FW/YFM35FX/YFM400FW

If you are repairing an oil leak from the left side crank seal at the pull starter, use the new style seal.

Description	Part Number
Old Style Seal	93103-28164-00
New Style Seal	93102-28476-00

Incorrect Frame Part Number - YFB250UJ "Timberwolf"

The microfiche for the YFB250UJ "Timberwolf" incorrectly lists the frame part number. The frame part number listed, is for earlier models without racks. The correct part number is 4BD-21110-31-R4. Identify whether the model you are working on does or does not have racks and use the following chart to order the appropriate frame:

Description	Part Number
Models with racks	4BD-21110-31-R4
Models without racks	4BD-21110-21-R4

This microfiche will be corrected and reissued at a later date.

If you have technical tips you think other dealers could use, let us know. You'll receive credit in the Tech Exchange for ideas we use, and we'll send you an exclusive Yamaha Tech Exchange hat as our thanks. Send your tips to: Yamaha Motor Corporation, U.S.A., Attn: Tech Exchange, P.O. Box 6555, Cypress, CA 90630

Oil Leaks From Right Side Crankcase Cover and/or Kickstarter Binds in the Down Position - YFS200 "Blaster" (All Year Models)

If you have a unit with an oil leak from the right crankcase cover or the kickstarter binds in the down position, or both, the cause may be a damaged dowel pin.

Remove and carefully inspect both dowel pins. If either dowel pin is damaged, replace it with a new one (P/N 99530-10014-00). Always install a new gasket (P/N 3JM-15451-11-00).
